

Junior Solution Engineer

General Information

Job Salary
Competitive

Location
Nashville, TN

Job Description

GEO Jobe is looking for a Junior Solution Engineer that is committed to growth and willing to learn the required skills to become a full Solution Engineer. As a result of this being an entry level position, displaying discipline and willingness to learn is of the utmost importance.

Responsibilities of a Solution Engineer (which is the position this eventually grows into) generally include:

- Assisting the development team in testing our products that are used by over 4,000 clients globally. These products include some of the ArcGIS Marketplace's top applications such as Admin Tools for ArcGIS Online and Mapfolio.
- Working with ArcGIS Online and ArcGIS Enterprise to configure various ESRI applications. i.e: Collector for ArcGIS, Operations Dashboard for ArcGIS, Configurable Templates, Web AppBuilder for ArcGIS, etc.
- Managing geodatabase synchronization and replicas for GEOPowered Cloud clients.
- Supporting our robust UAV operations including the post processing, tile caching, and QA / QC of remotely sensed data.

Job Requirements

Minimum

4 Year Degree in Geography, Computer Science, or a related field
Experience with ArcGIS Desktop
A passion for GIS and technology
Commitment to the team and discipline to learn the craft

Recommended

Some experience with ArcGIS Online

**Nice to Have**

Some experience with ArcGIS Pro

Some experience managing geodatabases and replication

An understanding of ArcGIS Server concepts such as managing services

To Apply

If you are an individual that meets the requirements above and are interested in joining a team of innovative GIS professionals, please apply today by sending your resume and cover letter to:

David Hansen, Chief Operating Officer
